FOR IMMEDIATE RELEASE

Voluntary Water Conservation Notice

Due to continued drier-than-average weather, the City of Oneida Water Department is asking customers to voluntarily conserve water until sufficient rainfall is received. Current tank levels remain stable and sufficient to maintain necessary fire protection; however, reducing demand now will help maintain reservoir and storage levels above established yield points.

Residents are asked to avoid unnecessary water use, including filling pools, washing vehicles, and using lawn sprinklers. Please also conserve water indoors by taking shorter showers, limiting bath water, and turning off faucets when brushing teeth, shaving, washing hands, or doing dishes. Every effort to reduce water consumption will help preserve our available water supply until conditions improve.
