I'M FILLING MY POOL, HOW MUCH WILL IT COST?

If you know the volume of the pool it is easy to estimate the cost to fill it. The following table will give you an example:

Volume (gallons)	Volume (100's cu. Ft.)	Water Cost	Sewer Cost	Total Cost	Pool Size (4' deep)
3,000	4.0	\$18.48	\$30.24	\$48.72	12'
5,000	6.7	\$30.80	\$50.40	\$81.20	15'
10,000	13.3	\$61.60	\$100.80	\$162.40	21'
15,000	20.0	\$92.40	\$151.20	\$243.60	27'
20,000	26.7	\$123.20	\$201.60	\$324.80	30'
25,000	33.3	\$154.00	\$252.00	\$406.00	33'

Or you can calculate the cost for water and sewer at \$16.24 per 1000 gallons of volume. Note that the City of Oneida does not allow hydrants to be used to fill pools and no adjustments are permitted on the sewer charges.

A normal hose running at full volume can discharge 600 gallons per hour or a 20,000 gallon pool can be filled in under a day and one-half.
