FOR IMMEDIATE RELEASE

Discolored water

The City of Oneida Water Department will be starting the Lake Street Pump station **Thursday (August 8, 2024)**, due to increase water demands in the system. **The starting of the pumps may cause some discoloration of the water due to increased flow.** Residents are advised to check their cold water prior to utilizing their hot water. Caution should be exercised if washing clothes will take place on this day. The discoloration is due to corrosion of some of the unlined water mains in the city.

The discoloration may affect the City of Oneida, Sherrill-Kenwood Water District, Village of Oneida Castle and Vernon, Town of Stockbridge, Prospect Street Water District, and Verona Rte 365 District.
